Professional Summary

I am a young graduate with post graduation degree in Psychology from one of the university and I was really passionate about my subject that all I wanted to do was apply these theories into real world.

In addition to attending a few international internship in psychology, I am currently part of an internship with the Institute of Clinical Hypnosis and Related Sciences (ICHARS) . These experiences have created a platform of clinical skills as well and gained knowledge . I hold CCC (Computer Course Certificate) its not only helping tools to be used for psychological background but also making me strong in technical manner. I would like to apply my commitment, new insights and real world experience to an energetic institution ready for me so that I can aid in important psychological research or clinical practice / counseling. As someone who is dedicated to lifelong learning and professional development, I am motivated by staying current with recent advances in psychology and related fields.
